## **HUSKY FERRIER WELL FOLLOW UP – WELL NOW UNDER CONTROL**

CALGARY, Alberta – Husky's Ferrier well (10-32-40-9W5) has been secured as of 7:00 p.m. June 25, after a sweet gas well blowout occurred June 15. The Ferrier site is located approximately 25 km northwest of Rocky Mountain House.

The well is now under control, and the specialized equipment and personnel required to return the well to a safe condition are now leaving the site. The cause of the blowout, which occurred during a completion operation, is still under investigation.
